

Text along a path

The grey lines are drawn separately - -segments only says where the text runs.

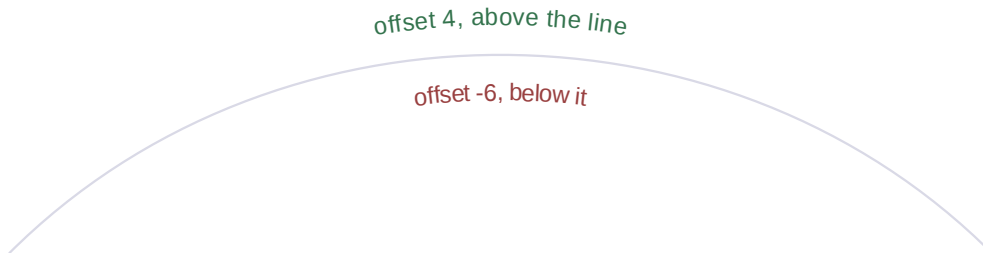

two arcs, -align center

one curve, 87 mm long

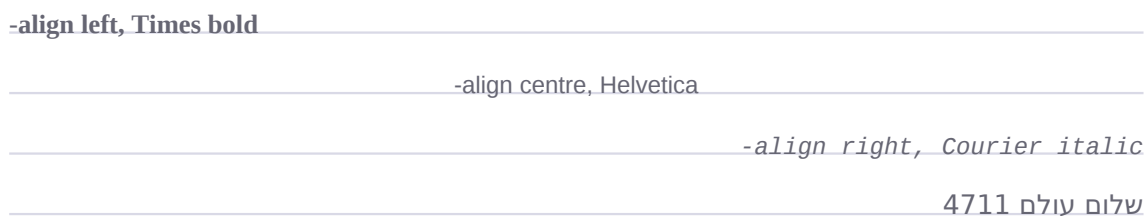

Offset from the path

-offset moves the baseline off the path without changing the path itself: positive above, negative below.

Along one line, three alignments

The same 150 mm path four times: -align left, centre and right, and a right-to-left line, whose -align left is the right hand end.

-direction rtl: the line begins at the right, the number keeps its order
