

Embedded face - Identity-H, any code point

The same twelve lines. A line that cannot be set is replaced by the reason it could not.

English	The quick brown fox jumps over the lazy dog
German	Größere Blätter, weiße Äpfel - 12,50 €
French	Les œufs frais coûtent 3,20 € à Noël
Spanish	El niño preguntó: ¿cuánto cuesta?
Portuguese	A informação está na seção três
Polish	Złota jesień w Łodzi i Gdańsku
Czech	Příliš žluťoučký kůň
Turkish	İstanbul'da bir şehir gezisi
Greek	Αθήνα - καλημέρα
Danish	Rødgrød med fløde på Æbeltoft
Swedish	Räksmörgås på Öland i påsk
Bulgarian	София - добър ден и благодаря

Lines that could not be set: 0 of 12

DejaVu Sans is embedded and reduced to the glyphs actually used. Identity-H addresses glyphs directly, so the encoding is no longer a limit - and a ToUnicode CMap keeps the text copyable and searchable. The face carries 6253 glyphs and maps 5918 characters; only the ones on this page go into the file.
